

Fresh, fragrant and clean air is unfortunately no longer a matter of course today. The advances in technology through industry, increasing traffic or other polluting influences are becoming more and more noticeable and affect our everyday lives. Health complaints such as headaches, nausea, general malaise and the so-called "sick building syndrome" are the consequences.

These symptoms are mainly caused by indoor air pollution, which would be:

- Unpleasant odor molecules
- Viruses and bacteria
- Pathogens and germs
- VOCs (gases)
- Fungal spores and microorganisms
- Dust and other harmful particles

The ionization devices from ARS were specially designed to efficiently kill harmful organisms and to neutralize pollutants and odor molecules. Well-being and health are important goods and must be preserved, especially in closed rooms without fresh air supply. The visually appealing ARS devices are user-friendly and easy to maintain.

There are various designs for rooms of different sizes and these can be installed and adjusted individually.

The principle of action is based on a natural process. The sun in general or lightning bolts generate positively and negatively charged small ions through electrical discharges from neutral oxygen molecules. We reproduce this process with our ionization tubes and use the positive effects specifically for you.

ARS Built-in Element 5-C8

Technical specifications

Dimensions LxWxH [mm]	335 x 185 x 310	Fuse	1 x 0.2A slow
Power consumption	30W	Air performance [m³/h]	2000
Ionization tube type	8 x C-tubes	Room volume [m³]	200
Height in the air duct [mm]	200	Air flow through tube	Vmin = 2 m/s
Flow	Vmax = 15 m/s	Weight	Approx. 4.5kg
Associated frame	600510		

Power consumption	Article number	Power consumption	Article number
100V, 50/60Hz	000046	230V, 50/60Hz CH-Plug	000045
120V, 50/60Hz	000048	230V, 50/60Hz EU-Plug	000047

The most common areas of application are:

- Air conditioning and ventilation systems
- Supply and exhaust air ducts
- Offices
- Public transportation
- Wastewater treatment plants
- Exhaust air disposal and much more

The built-in elements from ARS are perfectly suited to be installed in existing or new air conditioning and ventilation systems or supply and exhaust air ducts. In this way, they do their job almost invisibly, but reliably.

Our sales partner www.airoclean.ch will be happy to provide you with additional information material, open questions about the technology or other devices, as well as for a consultation. Just get in touch with them!
