

Fresh, fragrant and clean air is unfortunately no longer a matter of course today. The advances in technology through industry, increasing traffic or other polluting influences are becoming more and more noticeable and affect our everyday lives. Health complaints such as headaches, nausea, general malaise and the so-called "sick building syndrome" are the consequences.

These symptoms are mainly caused by indoor air pollution, which would be:

- Unpleasant odor molecules
- Viruses and bacteria
- Pathogens and germs
- VOCs (gases)
- Fungal spores and microorganisms
- Dust and other harmful particles

The ionization devices from ARS were specially designed to efficiently kill harmful organisms and to neutralize pollutants and odor molecules. Well-being and health are important goods and must be preserved, especially in closed rooms without fresh air supply. The visually appealing ARS devices are user-friendly and easy to maintain.

There are various designs for rooms of different sizes and these can be installed and adjusted individually.

The principle of action is based on a natural process. The sun in general or lightning bolts generate positively and negatively charged small ions through electrical discharges from neutral oxygen molecules. We reproduce this process with our ionization tubes and use the positive effects specifically for you.

ARS Disinfection device Mini-A

Technical specifications

Dimensions LxWxH [mm]	130 x 47 x 32	Power consumption	1.5W
Power connection	230V, 50/60 Hz, 12-24V, max. 1A	Performance range / room volume	Depending on the air quality, up to a max. of 25m ³
Ionization tube type	A-tube	Mounting options	Wall, ceiling, hanging, lying
Color (outer housing)	White	Weight	approx. 130g
Operating indicator	Blue diode		
Variants	Article number	Power adapter	Article number
With adapter EU 230V - 12V	020010	Adapter EU 230V - 12V	020011
Without adapter	020012	Car adapter 12/24V	020025

The disinfection devices are excellent solutions for food storage. Bacteria and germs are a big problem, especially when dealing with food. Your goods will stay fresh longer and unpleasant smells will also be avoided.

The most common areas of application are:

- Cold rooms and counters
- Kitchens
- Storage rooms and cellars
- Living rooms
- Offices
- Toilets and much more

Reliably neutralizes odors from fish, cheese, smells from the kitchen, musty smells, tobacco smells, etc. Unwanted ripening processes are also prevented.

Only operate with the power supply unit supplied!

Our sales partner
www.airoclean.ch will be happy to provide you with additional information material, open questions about the technology or other devices, as well as for a consultation. Just get in touch with them!
